Commercial Property Maintenance Services Ltd

Existing outgoing services rationalised

Possession work

New substation installed and commissioned

## SERVICE ALTERATIONS WATER AND ELECTRIC

As part of the National Station Improvement Programme, CPMS were awarded the contract by Network Rail to upgrade depot services the project comprises the following elements:

- Excavation and installation of a 90mm protector line water main with numerous connection points
- Hand dig of majority of the site, due to utilities being present on proposed route of new 400m water main
- Possession works to excavate underneath existing track lines
- Installation and commission new sub station
- Rationalise all existing outgoing services
- Termination of existing supplies

All works undertaken were through contaminated ground, special precautions were undertaken to ensure safety of all staff and safe disposal of contaminated soil.
